motor speech disorders substrates differential diagnosis and management

Sat, 19 Jan 2019 20:38:00 GMT motor speech disorders substrates differential pdf - Dysarthria is a motor speech disorder resulting from neurological injury of the motor component of the motor-speech system and is characterized by poor articulation of phonemes. In other words, it is a condition in which problems effectively occur with the muscles that help produce speech, often making it very difficult to pronounce words. Sat, 19 Jan 2019 19:27:00 GMT Dysarthria - Wikipedia - 5 Primary Characteristics of Apraxia of Speech (AOS) 1. Slow rate of speech 2. Sound distortions 3. Sound substitutions 4.
